

THE ART OF ARCHITECTURE

Based in West London, OS Designs is a leading interior design company, specialising in interior architecture

OS Designs' studio has an international portfolio ranging from large-scale architectural design and renovation for listed buildings to commercial and residential interior design for projects across London and the Home Counties.

OS Designs has also completed extensive work on numerous private palaces in the Middle East, where the design team successfully completed projects with their trademark elegance and sophistication while still holding the clients vision at the forefront of the design.

In order to turn the conceptual design into reality, OS Designs project manages each project down to

the finest detail; this allows the vision to come to life without compromising the design or quality.

OS Designs carefully manages each project from beginning to end, offering complete design service and project management throughout. Oz Lancaster is the Design Director and Founder of the studio, and together with an experienced team of designers she provides beautifully unique and functional designs for each individual client. OS Designs places great emphasis on maintaining strong client relations, tailoring each project to the specific needs and vision of the individual, creating exceptional, elegant interiors for private and commercial clients.

According to design director Oz Lancaster, the key to realising a successful interior is to create a story around the space. The team is passionate about developing their clients' individual stories and reflecting that story throughout the design of the property, whether it's a new home or a listed building, the story begins with the design.

Platinum Penthouse

The Platinum Penthouse is a true emporium of style and design. More than ten tonnes of the finest rare marble has been installed. As well as some fives miles of IT cabling for the state-of-the-art home entertainment and technology system. Bespoke fixtures and fittings feature throughout. Specially commissioned artwork adorns almost every wall, and all furniture has been carefully curated and designed to fit within the overriding design aesthetic.

At the heart of the design process has been OS Designs' focus on quality, attention to detail and meticulous presentation, standards which are evident throughout all of the company's interior design portfolio.

The Platinum Penthouse, which sits on the 28th floor of Stratford Riverside, provides stunning 360-degree views of the city.

Creating a home that felt luxurious whilst practical was one of the main influences behind the interior design of the penthouse; OS Designs aim was to create a residence with the feel and appeal of a sumptuous international hotel, but with the comfort and personal touches of a real home.

Hyde Park Gardens

OS Designs has been working on Hyde Park Gardens from the initial planning applications, through the full design and build process to the installation and styling. The prestigious Grade II listed town house is situated overlooking Hyde Park, where fantastic views of the park

can be seen from the 3 contemporarily designed flats occupying the upper floors. In contrast the main house, spread over the basement ground and first floors, has been painstakingly renovated and restored to its traditional splendour.

All aspects of 18,000 sq ft (1,672 m²) building from conception to installation have been carefully selected and constructed with a focus on quality and meticulous attention to detail.
